

## Elegant Marble Design PVC Lamination Film 0.1mm-0.5mm Thin 1400mm For Various Applications

### Our Product Introduction

for more products please visit us on [realsundeco.com](http://realsundeco.com)

#### Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

#### Product Specification

- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Length: 100m-400m/roll
- Thickness: 0.1mm-0.5mm
- Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.
- Width: 1260mm, 1400mm
- Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch
- Material: PVC
- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On
- Highlight: **0.1mm-0.5mm PVC Lamination Film,**  
**Elegant Marble Design PVC Lamination Film ,**

## Product Description:

Our PVC foil is made primarily of Polyvinyl Chloride (PVC), a synthetic plastic renowned for its exceptional strength, flexibility, and processing ease. It is our main ingredient, providing our foil with these valuable properties.

We offer a wide variety of colors, patterns, and textures for our PVC foil. It can imitate the appearance of real materials like wood, stone, cloth, or metal, making it an affordable and premium option for interior decoration.

Our decorative foil is adaptable to a broad range of surfaces such as walls, doors, cabinets, and furniture. In addition, it can be applied in different interior spaces, contributing to its versatility and popularity.

Realsun Deco PVC foil is highly durable, known for its strength and resistance to deterioration. Its longevity and ability to withstand high traffic areas have made it a popular choice in the market.

After installation, our PVC foil requires minimal maintenance. Regularly wiping it down with a wet cloth once a week is all that is needed to keep the surface clean, making it an easy-to-maintain decorative option.

One of the primary advantages of our PVC decorative foil is its cost-effectiveness. Compared to natural materials, such as wood or stone, our foil has a lower cost but maintains a sophisticated and elegant appearance, enabling builders and homeowners to achieve their desired look while staying within their budget.

Manufacturers provide a wide variety of styles and finishes that can be tailored to meet individual design preferences and project requirements. This allows for flexibility and customization, ensuring that the final outcome fulfills all the necessary design specifications. Decorative PVC foil has a broad range of applications, including wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and many other home and commercial applications.

## Features:

Product Name: PVC Lamination Film

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Service: OEM, Customized Design And Size

Width: 1260mm, 1400mm

Length: 100m-400m/roll

Material: PVC

This PVC Lamination Film is perfect for creating a wood grain effect on any surface. This pvc laminating sheet can be used to cover furniture, walls, and floors. With its durable and long-lasting laminate plastic sheet, this product is the perfect solution to any design need.

## Technical Parameters:

### Product Information

The thickness of our product ranges from 0.1mm to 0.5mm. This allows for flexibility in choosing the right material for your needs. Whether you require something thin and pliable, or something sturdier, we have the right solution for you.

We also offer two widths for our products: 1260mm and 1400mm. This ensures that our products are the perfect fit for a variety of applications, providing ample coverage and eliminating the need for additional cutting or adjustments.

Our product is available in rolls of 100-400m in length, depending on your specific requirements. This makes it easy to use and maneuver, and allows for efficient installation processes.

We have a wide range of design options available for our product. You can choose from wood grain, solid color, marble, brick, and other designs that suit your preferences and needs. This ensures that our products are not only functional but also aesthetically pleasing.

Our products also come in a variety of surface treatments. We offer Matt, Super Matt, embossed, high gloss, and soft touch finishes. This allows for flexibility in usage and provides the ability to personalize the finished product.

We provide OEM and ODM services. This ensures that we can attend to your specific requests and preferences, and we work closely with our clients to ensure that their needs are adequately met.

## Applications:

### Different Processes for Different Applications

There are various processes to cover different surfaces with PVC film for different applications. Below are some of the most common processes:

#### 1. Membrane Press (Vacuum Press)

Membrane press or vacuum press is a process where PVC film is used to cover surfaces such as MDF, particleboard, wooden board, fiberboard, etc. This process is commonly used for doors, kitchen cabinets, wardrobes, furniture, etc. PVC film with a thickness of 0.20-0.50mm, width of 1260mm or 1400mm, and length of 100-300m per roll is used for this process. The film can cover embossed board and five surfaces at the same time.

#### 2. Wrapping Profiles

Wrapping profiles is a process where PVC film is used to cover all kinds of profiles including wood profile, aluminum profile, and PVC profile, etc. This process is commonly used for door frames, window sills, base channels, PVC ceilings and so on. PVC film with a thickness of 0.12-0.18mm, width of 40-1260mm, and length of 300-800m per roll is used for this process.

#### 3. Cold Laminating

Cold laminating is a process where PVC film is used to cover all kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel, etc. This process is commonly used for doors and furniture. PVC film with a thickness of 0.12-0.20mm, width of 1240-1260mm, and length of 300-500m per roll is used for this process.

#### 4. Hot Laminating

Hot laminating is a process where PVC film is used to cover surfaces such as PVC panel, steel panel, and aluminum panel for doors, skirting and so on. PVC film with a thickness of 0.16-0.30mm, width of 1260mm, and length of 200-300m per roll is used for this process.

#### 5. Self-Adhesive

Self-adhesive process involves using PVC film with a thickness of 0.10-0.20mm, width of 600mm or 1220mm, and length of 5-50m per roll. It can be put on any smooth surface for furniture and indoor decorations.

The PVC film is usually packed in rolls with wrapping foam sheet, kraft paper, and plastic sheet. Pallet packing is also available for shipping by sea or air. The roll is further protected with foam protection sheet, kraft paper head, and plastic sheet on the outside.

## Customization:

Our PVC Lamination Film, also known as Laminated PVC Sheet, is produced under the brand name Realsun Deco and originates from Foshan, China. With a minimum order quantity of 3000m/model, the price is negotiable and the packaging is done in rolls. The delivery time is 15-20 days, and the payment terms are T/T 30% down payment and 70% balance before shipment.

We have a supply ability of 500000m/month, and we offer OEM and Customized Design and Size services. The thickness of the film ranges from 0.1mm-0.5mm, and the length of the rolls is between 100m-400m. The width options are 1260mm and 1400mm. Our PVC Lamination Film can be applied to various surfaces such as furniture, doors, walls, kitchen cabinets, ceilings, etc.
