- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Material: PVC
- Width: 1260mm, 1400mm
- Highlight: **0.5mm Wood Grain Wrapping,**
0.1mm Wood Grain Wrapping,

Product Description

Product Description:

Material: Our PVC foil is made from Polyvinyl Chloride (PVC), a type of synthetic plastic that offers excellent strength, flexibility, and easy processing.

Appearance: We provide customers with a diverse range of colors, patterns, and textures for our PVC foil. It can imitate the natural appearance of materials such as wood, stone, cloth, or metal, but is more affordable and retains a high-end appearance.

Adaptability: Our PVC foil is suitable for use on various surfaces, including walls, doors, cabinets, and furniture. It works effectively on many surfaces and can be used in a variety of interior spaces.

Durability: Realsun Deco PVC foil is known for its superior strength, which allows it to resist deterioration. Its durability makes it a popular option for high-traffic areas.

Maintenance: Once our PVC foil is installed, it requires minimal attention. It only needs to be cleaned with a wet cloth once a week, making maintenance easy.

Economical: The primary advantage of our PVC decorative foil is its lower cost compared to natural materials. This means that sophisticated aesthetics can be achieved without the high cost.

Modification: Manufacturers offer a variety of styles and finishes, making it possible to modify PVC foil to meet project requirements and individual design preferences.

Application: Decorative PVC foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other purposes in both residential and commercial settings.

Features:

Product Name: PVC Lamination Film

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On

Material: PVC

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch

Width: 1260mm, 1400mm

Our PVC lamination film is a versatile product that can be used for a variety of purposes, including lamination, vacuum membrane press, wrapping, hot press and more. Made from high-quality PVC material, this lamination roll film is durable and long-lasting, making it ideal for use in furniture, doors, walls, kitchen cabinets, ceilings, and other applications.

Available in a range of surface finishes, including glossy, matte, embossed, super matte, and soft touch, our PVC lamination film is sure to meet your needs. And with widths of 1260mm and 1400mm, you can choose the size that best suits your project.

Technical Parameters:

The product specifications of this material include a thickness range between 0.1mm to 0.5mm, and a width that can be ordered in either 1260mm or 1400mm. Rolls of this material are available in lengths that span from 100m to 400m depending on the customer's preference.

This material is versatile in terms of design options as it is available with a variety of patterns including wood grain, solid color, marble, brick and other patterns. The surface treatment options include matt, super matt, embossed, high gloss, and soft touch finishes, which provide an additional element of customization.

The manufacturer also offers services, such as OEM and ODM, which cater to the needs of customers who may require customization of their products.

Applications:

Different Process for different application:

1. Membrane Press (vacuum press)

Thickness: 0.20-0.50mm Width: 1260mm, 1400mm Length: 100-300m/roll

Cover on MDF, particleboard, wooden board, fiberboard, etc. for doors, kitchen cabinet, wardrobe, furniture, etc. Cover embossed board, cover five surfaces at same time.

2. Wrapping Profiles

Thickness: 0.12-0.18mm Width: 40-1260mm Length: 300-800m/roll

Cover on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and so on

3. Cold Laminating

Thickness: 0.12-0.20mm Width: 1240-1260mm Length: 300-500m/roll

Cover on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture

4. Hot Laminating

Thickness: 0.16-0.30mm Width: 1260mm Length: 200-300m/roll

Cover on the PVC panel, steel panel, aluminum panel for doors, skirting and so on

5. Self-adhesive

Thickness: 0.10-0.20mm Width: 600mm/1220mm Length: 5-50m/roll

Can be put on any smooth surface for furniture and indoor decorations

The PVC film is packed by roll with foam protection sheet, kraft paper head, and plastic sheet outside. We offer pallet packing for shipping by sea or air.

Each of the applications mentioned above require a different process. Membrane Press, for instance, is a vacuum press used to cover materials such as MDF, particleboard, wooden board, fiberboard, etc. with thicknesses ranging from 0.20-0.50mm and widths of 1260mm and 1400mm. Wrapping Profiles, on the other hand, are used for different profiles, including wood, aluminum, and PVC profiles. Its thickness ranges from 0.12-0.18mm and widths of 40-1260mm. Cold Laminating is best for flat panels, such as wood, steel, aluminum,

and PVC panels, typically used for doors and furniture with a thickness of 0.12-0.20mm, width of 1240-1260mm, and lengths of 300-500m per roll. Hot Laminating, with a thickness of 0.16-0.30mm, width of 1260mm, and length of 200-300m per roll, is best for covering PVC panels, steel panels, and aluminum panels for doors, skirting, and other decor needs. Finally, Self-adhesive, with a thickness of 0.10-0.20mm, widths of 600mm/1220mm, and lengths of 5-50m/roll, can be put on any smooth surface for indoor decoration and furniture. All pvc film is packed in rolls with wrapping foam sheet, kraft paper, and plastic sheet. For shipping, pallet packing is available for both sea and air transportation.
