- Highlight: **400m PVC Lamination Film Roll, Matte Finish PVC Lamination Film Roll**

Product Description

Product Description:

The main component of our PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic that is strong, flexible, and easy to work with. We provide a diverse selection of colors, patterns, and textures for our PVC foil. This imitates the look of genuine materials, such as stone, wood, or metal, while also being budget-friendly and maintaining an upscale appearance.

Our foil is versatile and can be used on a variety of surfaces, including walls, doors, cabinets, and furniture. It works effectively on various interior spaces, making it a versatile choice.

Realsun Deco PVC foil is well-known for its robustness and longevity. It is a favorite choice for heavy-traffic areas because of its durability.

After installation, our PVC foil is simple to maintain. It only requires a wet cloth once a week to keep it clean, making maintenance a breeze.

The primary benefit of our decorative PVC foil is its affordability when compared to traditional materials, making it a dependable and budget-friendly alternative. It also allows for the development of sophisticated aesthetics without the added costs.

The extensive variety of styles and finishes offered by manufacturers makes it possible to customize our PVC foil to meet project requirements and individual design preferences.

Our decorative PVC foil is used in a variety of applications, including wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other home and commercial uses.

Features:

Product Name: PVC Lamination Film

Thickness: 0.1mm-0.5mm

Service: OEM, Customized Design And Size

Length: 100m-400m/roll

Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Our PVC Lamination Film is a high-quality laminated PVC sheet that is perfect for a variety of applications. With a thickness range of 0.1mm-0.5mm, our lamination film is durable and long-lasting. We offer a range of services, including OEM and customized design and size options.

Our PVC Lamination Film comes in rolls ranging from 100m-400m, making it ideal for large-scale projects. It can be used for lamination, vacuum membrane press, wrapping, hot press, and more. We offer a wide range of designs, including wood grain, marble, brick, stone, plain color, and more.

Technical Parameters:

The thickness of our product ranges from 0.1mm to 0.5mm. This allows for versatility in usage and application based on your specific needs.

Our product comes in two width options to accommodate different requirements - 1260mm and 1400mm. This ensures that you can find the perfect fit for your project.

Each roll of our product is available in lengths ranging from 100m to 400m. You can choose the length that best suits your needs while minimising wastage and cost.

We offer a vast range of design options for our product including wood grain, solid color, marble, brick and many more. You can choose the design that best suits your decorative needs and preferences.

The surface of our product can be treated in a variety of ways to suit your desired finish. Whether it is a matt, super matt, embossed, high gloss or soft touch treatment that you desire, we can provide it.

We pride ourselves on our flexibility and ability to cater to our customers' unique requirements. We offer OEM and ODM services to meet your specific needs and ensure customer satisfaction.

Applications:

Different Process for Different Applications:

1. Membrane Press (Vacuum Press)

Thickness: 0.20-0.50mm

Width: 1260mm, 1400mm

Length: 100-300m/roll

Cover on MDF, particleboard, wooden board, fiberboard, etc. for doors, kitchen cabinet, wardrobe, furniture, etc. Cover embossed board, cover five surfaces at same time.

2. Wrapping Profiles

Thickness: 0.12-0.18mm

Width: 40-1260mm

Length: 300-800m/roll

Cover on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and so on

3. Cold Laminating

Thickness: 0.12-0.20mm

Width: 1240-1260mm

Length: 300-500m/roll

Cover on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture.

4. Hot Laminating

Thickness: 0.16-0.30mm
Width: 1260mm
Length: 200-300m/roll
Cover on the PVC panel, steel panel, aluminum panel for doors, skirting and so on.
5. Self-adhesive

Thickness: 0.10-0.20mm
Width: 600mm/1220mm
Length: 5-50m/roll
Can be put on any smooth surface for furniture and indoor decorations.
The PVC film is packed by roll with foam protection sheet, kraft paper head, and plastic sheet outside. We can offer pallet packing for shipping by sea or air.

The given content describes different processes to apply PVC film for various applications such as membrane press, wrapping profiles, cold laminating, hot laminating and self-adhesive. These processes come with different thickness and width measurements with varying length of rolls. Each process is designed to be used for specific surfaces such as MDF, particleboard, wooden board, fiberboard, aluminum profile, PVC profile, wood panel, steel panel, and aluminum panel. These processes are used for covering surfaces to create functional indoor furniture and decor items. The PVC film material is packed in rolls with foam protection sheet, kraft paper head, and plastic sheet outside for transportation by either sea or air.

Customization:

Our PVC lamination film comes in thickness ranging from 0.1mm-0.5mm and is available in different surfaces including glossy, matte, embossed, super matte, and soft touch. We offer various designs such as wood grain, marble, brick, stone, plain color, and more. Our services include OEM, customized design, and size options. Our rolls are 100m-400m in length, making them suitable for a wide range of applications.
