#### Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

#### Product Specification

- Service: OEM, Customized Design And Size
- Width: 1260mm, 1400mm
- Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.
- Thickness: 0.1mm-0.5mm
- Length: 100m-400m/roll
- Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On
- Material: PVC
- Highlight: **Wood Grain PVC Lamination Film ,  
Membrane Press Design PVC Lamination Film ,  
100-400m/roll PVC Lamination Film**

## Product Description

### Product Description:

The primary component of our PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic with outstanding strength, flexibility, and processing simplicity. PVC is a thermoplastic polymer with remarkable physical properties that are conducive to producing high-quality and durable PVC foil.

We provide a wide spectrum of colors, patterns, and textures for our PVC foil. It effectively mimics the appearance of natural materials like wood, stone, cloth, or metal, providing the luxurious feel at a fraction of the cost of genuine materials.

Our foil is highly adaptable to various surfaces, ranging from walls, doors, cabinets, and furniture. It can be applied to a wide range of interior spaces and works well on many surfaces.

Realsun Deco PVC foil is known for its strength and resistance to deterioration, making it an ideal choice for high-traffic areas. Its longevity enables it to withstand the test of time.

After installation, our PVC foil requires very little attention. It only needs to be cleaned once a week with a wet cloth, which makes maintenance a breeze.

The reduced cost of PVC decorative foil is one of its most significant advantages when compared to natural materials. You can achieve sophisticated aesthetics without incurring the associated costs, making it economical.

Manufacturers offer a diverse range of finishes and styles to satisfy project requirements and suit individual design preferences, which enables modification to achieve specific goals.

Decorative PVC foil is used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other applications in both residential and commercial settings.

### Features:

Product Name: PVC Lamination Film

Thickness: 0.1mm-0.5mm

Service: OEM, Customized Design And Size

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Length: 100m-400m/roll

Our PVC Lamination Film, also known as lamination PVC foil or laminate plastic sheet, is designed for various applications such as furniture, doors, walls, kitchen cabinets, and ceilings. This product comes in different designs including wood grain, marble, brick, stone, and plain colors. We offer OEM and customized design and size services to meet your specific requirements. With a thickness range of 0.1mm-0.5mm and a length of 100m-400m per roll, our lamination film is an ideal solution for your needs.

### Technical Parameters:

The thickness of our products ranges from 0.1 mm to 0.5 mm, providing options that suit different needs. Our products come in two widths, 1260 mm and 1400 mm, catering to customers with different requirements.

With our quality products, customers can enjoy the convenience of purchasing film materials in rolls. The length of our rolls ranges from 100 m to 400 m, providing flexibility to customers who have varying demand for our products.

Our products come in a variety of designs, including wood grain, solid colors, and marble patterns. Our distinct brick pattern series offers unique visual effect for customers who require a different look for their products.

We offer surface treatment that leaves customers satisfied. Our surface treatment series includes matt, super matt, embossed, high gloss, and soft touch finishes.

Our company is dedicated to providing excellent service to our customers. We offer both OEM and ODM services, working closely with our customers to ensure that their specific requests are met.

### Applications:

Different applications require different processes to achieve the desired result. Below are five different processes that can be used depending on the type of material and application.

#### 1. Membrane Press (Vacuum Press)

This process involves using a vacuum press to apply a PVC film with a thickness range of 0.20-0.50mm and available in widths of 1260mm and 1400mm. The length of the film is generally around 100-300m per roll. It can be used to cover MDF, particleboard, wooden board, fiberboard, or other types of surfaces for doors, kitchen cabinets, wardrobes, furniture, and more. It can additionally be used to emboss boards and cover five surfaces at the same time.

#### 2. Wrapping Profiles

The Wrapping Profiles process involves using a PVC film with a thickness of 0.12-0.18mm, which can be up to 1260mm in width and 300-800m in length per roll. This process covers all kinds of profiles, such as wood profile, aluminum profile, PVC profile, for door frames, window sills, base channels, PVC ceilings, and more.

#### 3. Cold Laminating

The Cold Laminating process uses a PVC film with a thickness of 0.12-0.20mm, which can range in width from 1240-1260mm and in length from 300-500m per roll. It is used to cover flat panels made from wood, steel, aluminum, PVC, and other materials, for doors and furniture.

#### 4. Hot Laminating

In this process, the PVC film with a thickness of 0.16-0.30mm is applied onto steel panels, aluminum panels, and PVC panels for doors, skirting, and other applications. The film is 1260mm in width and 200-300m in length per roll.

#### 5. Self-adhesive

The Self-adhesive process involves using a PVC film with a thickness of 0.10-0.20mm, which comes in widths of 600mm or 1220mm and

lengths ranging from 5-50m per roll. The film can be placed on any smooth surface for furniture and indoor decorations. The PVC film is packed in rolls with wrapping foam sheets, kraft paper, and plastic sheets. We also offer pallet packing for shipping by sea or air. The PVC film is packed by roll with foam protection sheets, kraft paper heads, and plastic sheets outside for additional protection.

## Customization:

Brand Name: Realsun Deco  
Place of Origin: Foshan, China  
Minimum Order Quantity: 3000m/model  
Price: Negotiable  
Packaging Details: Pack in roll  
Delivery Time: 15-20 days  
Payment Terms: T/T 30% down payment, 70% balance before shipment  
Supply Ability: 500000m/month  
Material: PVC  
Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch  
Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On  
Thickness: 0.1mm-0.5mm  
Service: OEM, Customized Design And Size  
Our lamination vinyl film, lamination film and laminated pvc sheet can be customized to meet your specific needs.

## Support and Services:

Our PVC Lamination Film is a high-quality product designed to provide superior protection and durability for a variety of applications. We offer comprehensive technical support and services to ensure that our customers get the most out of their investment. Our team of experts is available to provide guidance and assistance with product selection, installation, and maintenance. We also offer training programs to help customers optimize their use of our PVC Lamination Film and ensure long-lasting performance. In addition, we provide ongoing customer support to address any issues or concerns that may arise. Our goal is to ensure that our customers are fully satisfied with our PVC Lamination Film and have the resources they need to succeed.

## FAQ:

**Q: What is the brand name of your PVC lamination film?**  
A: Our PVC lamination film is under the brand name Realsun Deco.

**Q: Where is your PVC lamination film manufactured?**  
A: Our PVC lamination film is manufactured in Foshan, China.
