- Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.
- Highlight: **Wood Grain PVC Laminate Film,
Kitchen Cabinet PVC Laminate Film,**

Product Description

Product Description:

Our pvc foil is made of Polyvinyl Chloride (PVC), a synthetic plastic with exceptional strength, flexibility, and simplicity in processing. These features make it the principal ingredient in our high-quality foil.

We provide a wide range of colors, patterns, and textures to make our pvc foil imitate real materials like wood, stone, cloth, or metal while maintaining a premium appearance and being more affordable. Our variety of finishes guarantees that customers have a broad selection to choose from that meets their specific needs.

Our foil is perfect for a wide range of surfaces, from walls and doors to cabinets and furniture, making it adaptable and versatile. It is also effective on many surfaces, and can be applied in various indoor spaces.

Realsun Deco PVC foil is well-known for its durability and resistance to deterioration, making it a popular choice for high traffic areas that can withstand constant use and wear.

After installing our pvc foil, it will not require much attention. Maintenance is as easy as using a wet cloth once a week to clean it. This attribute significantly reduces the cost and time required to maintain the material.

A significant advantage of using decorative pvc foil over natural materials is its lower cost. The versatility of PVC foil allows for the creation of sophisticated aesthetics at a lower cost, enabling customers to enjoy premium aesthetics without high costs.

Manufacturers offer a broad range of finishes and styles that make it possible to modify the material to satisfy project requirements and individual design preferences. We offer a variety of finishes that can be tailored to the project and design needs of clients.

Decorative pvc foil is frequently used for various applications, including wall paneling, furniture surfaces, retail displays, interior doors, and kitchen and bathroom cabinets, making it ideal for both home and commercial applications.

Features:

Product Name: PVC Lamination Film

Service: OEM, Customized Design And Size

Material: PVC

Width: 1260mm, 1400mm

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch

Length: 100m-400m/roll

This PVC Lamination Film is a versatile product that can be used for a variety of purposes. It can be used as a lamination PVC foil, PVC laminating sheet, or lamination vinyl film. With a range of surface finishes such as glossy, matte, embossed, super matte, and soft touch, you can choose the perfect finish for your project. The PVC material ensures durability and longevity, making it a cost-effective solution. With widths of 1260mm and 1400mm, and lengths of 100m-400m per roll, you can customize this product to meet your specific needs. Our OEM and customization services ensure that you can get the perfect design and size for your project.

Technical Parameters:

Here is a rephrased version of the given text:

The thickness of our product ranges from 0.1mm to 0.5mm. We offer two different width options: 1260mm and 1400mm. The length of each roll ranges from 100m to 400m.

We offer a wide range of designs to choose from, including wood grain, solid color, marble, brick, and more. Our products have different surface treatments such as matt, super matt, embossed, high gloss, and soft touch.

We provide both OEM and ODM services to our customers, ensuring that they have the flexibility and adaptability they need to meet their unique needs.

Applications:

Different Process for Different Application:

1. Membrane Press (Vacuum Press)

Thickness: 0.20-0.50mm Width: 1260mm, 1400mm Length: 100-300m/roll

This process involves covering MDF, particleboard, wooden board, or fiberboard for doors, kitchen cabinet, wardrobe, furniture, etc. The embossed board can be covered with PVC, covering five surfaces simultaneously.

2. Wrapping Profiles

Thickness: 0.12-0.18mm Width: 40-1260mm Length: 300-800m/roll

This process requires covering all kinds of profiles including wood profile, aluminum profile, and PVC profile for doors, window sill, base channel, PVC ceiling and more.

3. Cold Laminating

Thickness: 0.12-0.20mm Width: 1240-1260mm Length: 300-500m/roll

Covering all kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel, and more for doors and furniture is the objective of this process.

4. Hot Laminating

Thickness: 0.16-0.30mm Width: 1260mm Length: 200-300m/roll

This process involves covering PVC panel, steel panel, aluminum panel for doors, skirting, etc.

5. Self-adhesive

Thickness: 0.10-0.20mm Width: 600mm/1220mm Length: 5-50m/roll

Self-adhesive PVC film can be used on any smooth surface for furniture and indoor decorations.

The PVC film is packed by roll with foam protection sheet, kraft paper head, and plastic sheet outside. We can offer pallet packing for shipping by sea or air.

Customization:

Support and Services:

Our PVC Lamination Film product comes with a comprehensive technical support and services package to ensure that our customers get the most out of their purchase. Our team of experts is available to provide assistance with installation, troubleshooting, and maintenance. We also offer training programs to help customers optimize their use of our PVC Lamination Film product. These programs cover topics such as product features, best practices, and safety guidelines. Our technical support team is always available to answer any questions that customers may have.

In addition, we offer a range of services to help customers get the most out of their PVC Lamination Film product. These services include custom design and development, product testing and analysis, and on-site support and maintenance.

Our goal is to provide our customers with the highest level of support and services, ensuring that they are able to achieve their goals with our PVC Lamination Film product.
