

Vinyl PVC foil with embossed wood texture, ideal for wrapping profile door frames or other Irregular shape

Our Product Introduction

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Model Number: L20240801-6
- Minimum Order Quantity: 3000m
- Price: USD 0.5/m~USD 5/m, negotiate
- Packaging Details: 100-400m/roll, packed with long woven, Kraft paper and PVC film
- Delivery Time: 15-20 days
- Payment Terms: L/C, T/T, Western Union
- Supply Ability: 500000m/month

Product Specification

- Material: PVC
- Thickness: 0.1mm-0.5mm
- Width: 1260mm, 1400mm
- Design: Wood Grain, Marble, Brick, Flower, Stone And So On
- Length: 100-400m/roll
- Application: Furniture, Kitchen Cabinet, Door, Profile, Wall And So On
- Service: OEM, ODM
- Surface: Matt, Embosse, High Gloss, Soft Touch
- Usage: Lamination, wrapping, vacuum Membrane Press
- Highlight: **Embossed Wood Texture PVC Foil ,
Wrapping Profile Door Frame PVC Foil**

Product Description

Embossed Wood Texture Vinyl PVC Foil For Wrapping Profile Door Frame

Detail Description

Elevating Surfaces with PVC Decorative Film

Crafted from polyvinyl chloride (PVC) plastic, this flexible decorative film offers a versatile solution for enhancing and protecting a wide range of surfaces. By incorporating strategic additives, this innovative material delivers exceptional flexibility, durability, and visual appeal.

The Multifaceted Appeal of PVC Decorative Film

Polyvinyl chloride (PVC) forms the foundation of this thin, pliable decorative film, which serves as a practical and aesthetically pleasing solution for transforming various surfaces. Through the strategic incorporation of specialized additives, this versatile product unlocks enhanced flexibility, longevity, and design possibilities.

PVC Decorative Film: Versatility Meets Functionality

Primarily composed of polyvinyl chloride (PVC) plastic, this flexible decorative film presents a multifaceted solution for revitalizing and safeguarding diverse surfaces. By combining PVC with carefully selected additives, this innovative material achieves exceptional versatility, durability, and visual impact.

A Versatile Plastic Solution: PVC Decorative Film

Polyvinyl chloride (PVC) forms the foundation of this thin, pliable decorative film, which offers a versatile solution for enhancing and protecting a wide range of surfaces. Through the strategic integration of specialized additives, this innovative material delivers enhanced flexibility, longevity, and aesthetic appeal.

Diverse Applications

PVC decorative film finds application in a wide range of indoor settings, including:

Wall coverings and wall decals: Adds decorative patterns, textures, or colors to walls.

Furniture veneers and surface protection: Protects and enhances the appearance of furniture.

Cabinet and appliance door coverings: Transforms the look of cabinetry and appliances.

Automotive and marine interiors: Decorates and protects the interior surfaces of vehicles and boats.

Advantages of PVC Decorative Film

PVC decorative film offers several key advantages:

Cost-effective and easy to install

Durable and scratch-resistant

Available in a vast array of colors, patterns, and textures

Waterproof and simple to clean

Considerations

When utilizing PVC decorative film, it is essential to consider factors such as surface preparation, application techniques, and potential environmental impact. Some PVC films may release volatile organic compounds (VOCs) over time, which is an important consideration.

In summary, PVC decorative film provides a versatile and practical solution for enhancing the appearance and protecting various indoor surfaces, offering a range of benefits that make it a popular choice among designers and homeowners alike.

Specification

Versatility and Customization in PVC Decorative Film

The diverse specifications of PVC decorative film cater to a wide range of applications and preferences:

Thickness Versatility

The wide thickness range of 0.1mm to 0.5mm allows for different durability requirements and applications. Thinner films may be suitable for lighter-use surfaces, while thicker options provide enhanced durability.

Accommodating Surface Sizes

The standard roll widths of 1260mm and 1400mm are designed to fit various surface dimensions, ensuring good coverage and minimizing seams.

Expansive Roll Lengths

The long roll lengths, spanning 100 to 400 meters, enable comprehensive coverage while reducing the need for frequent material changes.

Diverse Design Options

PVC decorative film offers a vast array of design choices, including wood grain, solid colors, marble, brick, and more. This enables users to achieve a wide variety of décor and aesthetic effects.

Surface Treatment Variety

The available surface treatments, such as matte, super matte, embossed, high gloss, and soft touch, provide different visual and tactile finishes to suit individual preferences.

Customization Opportunities

The availability of OEM (Original Equipment Manufacturer) and ODM (Original Design Manufacturer) services allows customers to explore customization and private labeling options, catering to their specific requirements.

This combination of versatile specifications and customization possibilities makes PVC decorative film a highly adaptable solution for numerous interior design and surface protection applications.

Suggestion of thickness and width for some application

Process Method	Thickness (mm)	Width (mm)	Length/roll (meters)	Application

Membrane Press (vacuum press)	0.20-0.50	1260,1400	100-300	Covers for doors, kitchen cabinets, wardrobes, furniture, etc. can be made of MDF, particleboard, wooden board, fiberboard, etc. Cover the embossed board, covering five areas simultaneously.
