

Glossy / Matte / Embossed Marble PVC Film For Furniture Wall Ceiling Door Cabinet

Our Product Introduction

for more products please visit us on realsundeco.com

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Packing: Pack In Roll With Foam Sheet, Kraft Paper And Plastic Sheet
- Surface: Glossy/ Matte/ Embossed/ Texture/ Soft Touch
- MOQ: 3000m/model
- Material: PVC
- Thickness: 0.10mm-0.5mm
- Color: Marble, Brick, Wood Grain And So On
- Service: OEM, ODM
- Product Name: Marble PVC Film
- Highlight: **Embossed Marble PVC Film,**
Matte Marble PVC Film,
Glossy Marble PVC Film

Product Description

Product Description:

Detail Description

Marble PVC film is a type of PVC decorative film that has a mirror-like shiny finish, which is achieved through specialized manufacturing processes and surface treatments.

Composition:

Marble PVC film is composed primarily of polyvinyl chloride (PVC) plastic, along with additives such as plasticizers, stabilizers, and pigments which improve its properties.

Applications:

Marble PVC film is commonly used for:

Furniture veneers and surface overlays

Cabinet and appliance door coverings

Wall coverings and decorative panels

Automotive and marine interior trims

Features and Benefits:

Extremely smooth, reflective high-gloss finish

Durable and scratch-resistant surface

Available in a variety of solid colors and patterns

Easy to clean and maintain

Can be thermoformed or vacuum formed for curved surfaces

Considerations:

Requires careful surface preparation for optimal adhesion

May be more susceptible to showing fingerprints and smudges compared to matte or satin finishes

Some high gloss PVC films may contain higher levels of volatile organic compounds (VOCs)

Overall, the high gloss surface of marble PVC film provides a modern and sleek aesthetic, making it a popular choice for various interior design and surface finishing applications.

Applications:

The high gloss PVC decorative film comes in varying thicknesses that are suitable for different applications. The thinner range of 0.1mm to 0.2mm is commonly used for producing furniture veneers, cabinet door overlays, and automotive trims due to its lightweight and flexible nature. Being pliable, this range is ideal for wrapping or thermoforming around edges and corners.

If you require a more durable and rigid material, the slightly thicker range of 0.3mm to 0.5mm will provide the necessary strength and scratch resistance. It is suitable for wall coverings, decorative panels, and surfaces that require extensive bending or shaping.

The selection of a specific thickness for high gloss PVC decorative films will depend on the intended application. The desired balance between flexibility, strength, and ease of installation must be taken into account when making a thickness choice.

Thinner high gloss PVC films (0.1 - 0.2 mm) are often preferred for applications where the film needs to be wrapped or thermoformed around edges and corners. Thicker high gloss PVC films (0.3 - 0.5 mm) offer greater protection and stability and are ideal for flat, smooth surfaces that don't require extensive bending or shaping, like cabinet doors or large wall panels.

Choosing the right thickness of high gloss PVC decorative film is vital in ensuring that it meets the specific performance requirements of your intended application.

Customization:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Application: Furniture/ Cabinet/ Wall/ Ceiling/ Door

MOQ: 3000m/model

Thickness: 0.10mm-0.5mm
