

Durable Marble Look PVC Film For Interior Decoration

Our Product Introduction

for more products please visit us on realsundeco.com

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Color: Marble, Brick, Wood Grain And So On
- Surface: Glossy/ Matte/ Embossed/ Texture/ Soft Touch
- Packing: Pack In Roll With Foam Sheet, Kraft Paper And Plastic Sheet
- Application: Furniture/ Cabinet/ Wall/ Ceiling/ Door
- Length: 100-400m/roll
- Service: OEM, ODM
- Material: PVC
- Width: 1260mm, 1400mm
- Highlight: **Interior Decoration PVC Film,
Durable Marble PVC Film,
Interior Decoration Marble PVC Film**

Product Description

Product Description:

Marble PVC film is a type of PVC decorative film with a smooth, mirror-like shiny surface finish. This high gloss appearance is obtained through specialized manufacturing processes and surface treatments. The film is primarily composed of polyvinyl chloride (PVC) plastic with possible additives such as plasticizers, stabilizers, and pigments to enhance its properties.

Marble PVC film is commonly used for various interior design and surface finishing applications such as furniture veneers, cabinet and appliance door coverings, wall coverings, decorative panels, and automotive and marine interior trims. Its extremely smooth, reflective high-gloss finish and durable and scratch-resistant surface make it a popular choice for these applications.

The marble PVC film is available in a variety of solid colors and patterns and is easy to clean and maintain. Additionally, it can be thermoformed or vacuum formed to fit curved surfaces, providing versatility in its usage.

However, there are some considerations to keep in mind while using marble PVC film. It requires careful surface preparation for optimal adhesion and may be more susceptible to showing fingerprints and smudges compared to matte or satin finishes. Furthermore, certain types of high gloss PVC films may contain higher levels of volatile organic compounds (VOCs).

Applications:

The Thickness Ranges of High Gloss PVC Decorative Film

High gloss PVC decorative film is available in various thickness ranges to suit a wide range of applications. The two primary thickness ranges are:

0.1 mm to 0.2 mm

0.3 mm to 0.5 mm

The choice of specific thickness within these ranges depends on the intended application and the desired balance between flexibility, strength, and ease of installation.

0.1 mm to 0.2 mm

The thinner range of high gloss PVC decorative film (0.1 mm to 0.2 mm) is typically used for applications where a lightweight and flexible material is required. For example, furniture veneers, cabinet door overlays, or automotive trim.

Being more pliable and flexible, these thinner films can conform to curved surfaces more easily and are therefore preferred for applications where the film needs to be wrapped or thermoformed around edges and corners.

0.3 mm to 0.5 mm

The slightly thicker range of high gloss PVC decorative film (0.3 mm to 0.5 mm) provides more durability and rigidity, and is therefore suitable for uses like wall coverings, decorative panels, or surfaces that require higher scratch resistance.

Thicker films offer greater protection and stability, making them a better choice for flat, smooth surfaces that don't require extensive bending or shaping, such as cabinet doors or large wall panels.

When selecting high gloss PVC decorative film, the thickness choice is an important consideration to ensure it meets the specific performance requirements of the intended application.

Customization:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

Payment Terms: T/T 30% down payment, 70% balance before shipment

Supply Ability: 500000m/month

Length: 100-400m/roll

Thickness: 0.10mm-0.5mm

Surface: Glossy/ Matte/ Embossed/ Texture/ Soft Touch

Service: OEM, ODM

MOQ: 3000m/model

Our PVC composite film, also known as PVC foil for cabinet door or PVC foil for furniture, is highly customizable to meet your needs.
