

## PVC Interior Film With Thickness 0.10mm-0.50mm For Vacuum Membrane Press

Our Product Introduction

for more products please visit us on [realsundeco.com](http://realsundeco.com)

### Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

### Product Specification

- Material: PVC
- Packaging: Pack By Roll With Foam Sheet, Kraft Paper, Plastic Sheet, And Pallet, Etc.
- Length: 100-400m/roll
- Thickness: 0.10mm-0.50mm
- Usage For Production Process: Lamination, Vacuum Membrane Press, Hot Press, Wrapping And So On
- Service: OEM, ODM
- Width: 1260mm, 1400mm
- Payment Term: T/T, L/C, Etc.
- Highlight: **0.10mm PVC Interior Film**

## Product Description

### Product Description:

PVC decorative film is a popular film used for decorative purposes in various industries. This versatile, flexible, and durable film is primarily made from polyvinyl chloride (PVC) and can be printed, embossed, or laminated with different textures and designs to resemble materials like wood, stone, leather, and fabric. It is widely used in industries such as interior design, furniture, automotive, packaging, and consumer goods.

PVC decorative films come in a wide variety of designs, including wood grain, stone, marble, and solid colors. This makes it popular for applications where aesthetics are important but cost-effective alternatives to natural materials are needed. Additionally, PVC films are resistant to wear, moisture, and chemicals, making them suitable for both indoor and outdoor applications.

One of the biggest advantages of PVC decorative films is their flexibility. They can be applied to a variety of substrates, such as MDF, particle board, PVC, metal, and glass. Furthermore, they can be easily shaped and adapted to different forms, making them highly versatile. PVC decorative films are typically applied using adhesive backing, making them easy to install on surfaces. Some are also heat-activated, providing a more permanent bond.

PVC film production has become more environmentally friendly in recent years. While modern PVC films are often made with non-toxic, eco-friendly processes, their environmental impact varies depending on production methods and recycling practices.

PVC decorative films are commonly used in the furniture industry for laminating or covering surfaces of cabinets, tables, doors, and panels to give them a premium look at a lower cost than natural materials. Additionally, PVC films are used to wrap walls, ceilings, and partitions in homes, offices, and commercial spaces for interior design purposes. In the automotive industry, PVC films are used for interior trim pieces in cars, such as dashboards, door panels, and other interior parts.

### Applications:

Applications of PVC Film:

PVC film is a versatile material that can be used in a variety of industries for different purposes. Here are some of the most common applications of PVC film:

**Decorative Laminates:**

PVC film is often used in the furniture, doors, and cabinetry industry to simulate wood, stone, or fabric finishes. This is because PVC film is easy to print on and can be designed to look like a wide range of materials.

**Automotive:**

PVC film can be used in the automotive industry for various applications such as interior trims, dashboards, and seats. This is because PVC film is resistant to heat, water, and chemicals, making it ideal for the automotive industry.

**Medical & Safety:**

PVC film is a popular choice in the medical and safety industries because it is non-toxic and chemical-resistant. It is often used in medical packaging and as protective coatings for different products.

Overall, PVC film is a versatile material that has a wide range of applications in various industries. Its flexibility, durability, and non-toxicity make it a popular choice for several industries including packaging, automotive, medical and safety, and decorative laminates.

### Support and Services:

Our PVC Interior Film product comes with comprehensive technical support and services to ensure the best possible experience for our customers. Our team of experts is available to provide assistance with product installation, maintenance, and troubleshooting. We also offer product training and educational resources to help our customers get the most out of their PVC Interior Film. Additionally, we provide warranty and repair services to ensure the longevity and durability of our product. Contact us to learn more about our technical support and services.

### FAQ:

**Q1: What is the brand name of the PVC Interior Film?**

A1: The brand name of our PVC Interior Film is Realsun Deco.

**Q2: Where is the PVC Interior Film made?**

A2: Our PVC Interior Film is made in Foshan, China.

**Q3: What is the minimum order quantity for the PVC Interior Film?**

A3: The minimum order quantity for our PVC Interior Film is 3000m/model.

**Q4: How much does the PVC Interior Film cost?**

A4: The price of our PVC Interior Film is negotiable.

**Q5: How is the PVC Interior Film packaged and how long is the delivery time?**

A5: Our PVC Interior Film is packed in rolls and the delivery time is 15-20 days.
