

PVC Thickness 0.10mm 0.50mm Decorative Film Width 1260mm Durable Material for Surface Protection and Decorative Purposes

Our Product Introduction

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.
- Length: 100m-400m
- MOQ: 3000m/model
- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Width: 1260mm, 1400mm
- Material: PVC
- Thickness: 0.10mm-0.50mm
- Highlight: **PVC decorative film for surface protection, Durable PVC film 1260mm width, 0.10mm thick PVC decorative film**

Product Description

Product Description:

The PVC Decorative Film is a versatile and high-quality product designed to enhance the appearance and durability of various surfaces, particularly in the furniture and interior decoration industries. Manufactured from premium PVC material, this film offers an excellent combination of durability, flexibility, and aesthetic appeal, making it an ideal choice for applications such as cabinetry, furniture surfaces, and door coverings. With a focus on safety and functionality, the PVC Decorative Film is crafted to meet the diverse needs of modern design while ensuring long-lasting performance.

One of the standout features of this PVC Decorative Film is its range of thicknesses, varying from 0.10mm to 0.50mm. This range allows customers to select the perfect thickness for their specific application, whether they require a thin, flexible layer for intricate design work or a thicker, more robust film for high-traffic areas. The material's excellent adaptability helps in wrapping complex shapes and surfaces smoothly, providing a seamless and professional finish.

The film is available in widths of 1260mm and 1400mm, catering to different project sizes and requirements. These widths are standard in the industry, making the PVC Decorative Film compatible with most wrapping and laminating machinery used in furniture manufacturing and door panel production. Additionally, the film comes in lengths ranging from 100 meters up to 400 meters, allowing for efficient use in both small-scale and large-scale production environments. This flexibility in size options helps reduce waste and optimize project costs.

Safety and environmental considerations are paramount in the design of this PVC membrane for furniture applications. The film is completely non-toxic, ensuring that it is safe for use in residential and commercial spaces without posing any health risks. This attribute is particularly important for furniture surfaces and door coverings where prolonged human contact is common. Furthermore, the PVC Decorative Film is treated with anti-flame properties, significantly reducing the risk of fire hazards. This feature makes it an excellent choice for environments where fire safety regulations are stringent, offering peace of mind alongside aesthetic enhancement.

In addition to its safety features, the film is moisture-proof, which protects the underlying surfaces from damage caused by humidity and water exposure. This moisture resistance extends the lifespan of furniture and doors by preventing warping, swelling, or deterioration that often occurs in damp conditions. The moisture-proof quality also makes the PVC membrane foil suitable for use in kitchens, bathrooms, and other areas prone to moisture, maintaining both the appearance and structural integrity of the surfaces it covers.

The PVC door foil variant of this decorative film is specifically designed to meet the demands of door manufacturers and renovators. It adheres well to door panels, providing a smooth, durable finish that can replicate various textures and colors. This capability allows for customization and modernization of door designs without the need for expensive replacements. The door foil is easy to clean and maintain, ensuring that doors retain their attractive look even after years of use.

In summary, the PVC Decorative Film is a high-performance, aesthetically versatile product that combines safety, durability, and design flexibility. Its range of thicknesses from 0.10mm to 0.50mm, widths of 1260mm and 1400mm, and lengths from 100m to 400m make it adaptable to diverse project requirements. Made from non-toxic PVC material, it offers anti-flame and moisture-proof features, ensuring safety and longevity in furniture and door applications. Whether used as a PVC membrane for furniture, pvc membrane foil, or pvc door foil, this decorative film provides a reliable and attractive solution for enhancing interior surfaces with style and protection.

Features:

Product Name: PVC Decorative Film

Material: High gloss PVC film

Non-toxic and safe for use

Anti-flame properties for enhanced safety

Moisture-proof to prevent damage

Available lengths from 100m to 400m

Widths available: 1260mm and 1400mm

Thickness range: 0.10mm to 0.50mm

Ideal PVC membrane for furniture applications

Technical Parameters:

Thickness	0.10mm - 0.50mm
MOQ	3000m/model
Width	1260mm, 1400mm
Surface	Glossy / Matt / Embossed / Super Matt / Soft Touch
Feature	Non-toxic / Anti-Flame / Moisture-proof
Application	Furniture / Cabinet / Door / Wall / Ceiling / Profile, Etc.
Material	PVC
Length	100m - 400m

Applications:

Realsun.Deco.PVC.Decorative.Film, originating from Foshan, China, is a versatile and high-quality material designed to enhance various interior and exterior applications. With a thickness range of 0.10mm to 0.50mm and lengths varying from 100m to 400m per roll, this PVC vacuum press film offers excellent durability and flexibility. Its non-toxic, anti-flame, and moisture-proof features make it an ideal choice for both residential and commercial environments, ensuring safety and longevity.

This PVC door foil is widely used in the manufacturing and renovation of doors, providing a smooth, attractive finish that resists wear and tear. It is perfect for creating elegant and modern door surfaces that are easy to maintain and clean. The moisture-proof characteristic ensures that doors remain unaffected by humidity, making it suitable for use in kitchens, bathrooms, and other moisture-prone areas. In addition to doors, Realsun Deco's PVC membrane for furniture is extensively applied in the furniture industry. It offers a protective and decorative layer on furniture surfaces such as cabinets, wardrobes, and tables, enhancing their aesthetic appeal while safeguarding them against scratches, stains, and moisture damage. The anti-flame property adds an extra level of safety, especially for furniture used in public spaces or commercial establishments.

The product is supplied in rolls, with a minimum order quantity of 3000 meters per model, making it suitable for large-scale projects. Realsun Deco ensures a steady supply ability of up to 500,000 meters per month, facilitating timely delivery within 15-20 days after order confirmation. The price is negotiable, providing flexibility to meet different budget requirements. Payment terms are structured as T/T with a 30% down payment and the remaining 70% balance due before shipment.

Due to its excellent performance and versatile applications, Realsun Deco PVC Decorative Film is perfect for use in furniture manufacturing, door production, interior decoration, and renovation projects. Whether for residential homes, commercial buildings, or industrial facilities, this PVC vacuum press film guarantees a stylish, durable, and safe finish that meets diverse design and functional needs.
