Product Description:

Our PVC Decorative Film is an exceptional solution designed to enhance the aesthetic appeal and durability of various surfaces, making it an ideal choice for interior decoration and furniture applications. Specifically crafted to meet the needs of modern design, this product is widely used as pvc foil for wardrobe surfaces, providing a stylish and durable finish that transforms ordinary furniture into elegant pieces. Whether you are looking to revamp wardrobes, cabinets, or other furniture items, our PVC decorative film offers a versatile and cost-effective way to achieve a high-end look.

This PVC Decorative Film stands out due to its superior quality and versatile features. Available in thicknesses ranging from 0.10mm to 0.50mm, it offers flexibility for different applications, ensuring that the film can be used on a variety of surfaces without compromising durability or appearance. The film comes in two standard widths, 1260mm and 1400mm, allowing for efficient coverage of large areas with minimal seams, which is particularly beneficial when working on wardrobe panels and other large furniture components.

One of the key highlights of this product is its diverse surface finishes, designed to cater to various design preferences and styles. Customers can choose from glossy, matt, embossed, super matt, and soft touch surfaces. The glossy finish provides a sleek, shiny appearance that enhances the vibrancy of colors and patterns, making it perfect for modern and contemporary designs. The matt and super matt finishes offer a more subdued and elegant look, ideal for creating a sophisticated ambiance. The embossed surface adds texture and depth, giving surfaces a tactile and visually interesting quality. Meanwhile, the soft touch finish delivers a smooth, velvety feel that adds a luxurious element to furniture surfaces.

In addition to aesthetic appeal, our PVC Decorative Film is engineered with important functional attributes that ensure safety and longevity. It is non-toxic, making it safe for use in residential and commercial environments. This feature is particularly important when the film is applied to wardrobes and furniture in homes with children or sensitive individuals. Additionally, the film is moisture-proof, protecting surfaces from water damage, swelling, and warping, which can occur in humid environments or kitchens. This moisture resistance extends the life of your furniture and maintains its pristine appearance over time.

Safety is further enhanced through the film's anti-flame properties. The PVC Decorative Film is designed to resist ignition and slow down the spread of flames, providing an extra layer of protection in case of fire. This makes it a reliable choice for applications where fire safety standards are critical, such as in commercial buildings and public spaces.

Our product is also available as pvc marble film, which mimics the luxurious and timeless look of natural marble. This variant is perfect for those who desire the elegance of marble surfaces without the high cost and maintenance associated with real stone. The pvc marble film can be applied to a wide range of surfaces, including wardrobes, countertops, and wall panels, offering a sophisticated and durable finish that resists scratches and stains.

For manufacturers and designers, the minimum order quantity (MOQ) is set at 3000 meters per model, ensuring that large projects can be completed efficiently while maintaining consistent quality and design integrity. This MOQ supports bulk production and provides cost advantages, making it an attractive option for large-scale commercial applications.

In summary, our PVC Decorative Film is a premium product that combines aesthetic versatility, functional durability, and safety. Whether you need pvc foil for wardrobe applications, or are looking to incorporate stylish pvc marble film into your designs, this product offers a reliable, attractive, and practical solution. With various thicknesses, widths, and surface finishes available, along with non-toxic, anti-flame, and moisture-proof properties, it is the perfect choice for enhancing the beauty and longevity of your interiors.

Features:

Applications:

Realsun.Deco, a renowned brand based in Foshan, China, specializes in producing high-quality PVC decorative films that are widely used

across various application occasions and scenarios. Our PVC marble film is an excellent choice for enhancing the aesthetic appeal of furniture, walls, and interior surfaces, providing a luxurious and sophisticated look at an affordable price. With a minimum order quantity of 3000 meters per model, we ensure that our customers receive consistent quality and sufficient supply to meet their project demands. One of the primary applications of Realsun Deco's PVC decorative film is in the furniture industry. The PVC membrane for furniture offers exceptional durability and flexibility, making it ideal for coating cabinets, wardrobes, tables, and other furniture pieces. Its high gloss pvc film finish gives furniture a sleek, modern, and polished appearance that mimics natural materials like marble or wood grain, thereby elevating the overall design without the high cost or maintenance associated with real stone or wood.

In addition to furniture, our PVC marble film is widely used for wall decoration and interior design projects. It can be applied to walls, ceilings, and partitions to create stunning visual effects in residential, commercial, and hospitality environments. The film's thickness ranges from 0.10mm to 0.50mm, and it comes in widths of 1260mm and 1400mm, allowing for versatile use on various surface sizes while maintaining ease of installation. Lengths vary from 100 meters to 400 meters per roll, and the product is conveniently packaged in rolls for efficient transportation and handling.

Realsun Deco offers a supply ability of 500,000 meters per month, ensuring a steady and reliable source for large-scale projects. Our delivery time is approximately 15-20 days, with flexible payment terms requiring a 30% down payment via T/T and the remaining 70% balance before shipment. Prices are negotiable to accommodate different budgetary needs, making our PVC decorative films an excellent choice for architects, designers, and manufacturers looking for quality and affordability.

Whether you are renovating a home, designing commercial interiors, or manufacturing high-end furniture, Realsun Deco's PVC decorative film provides a versatile and attractive solution. Its combination of durability, aesthetic appeal, and ease of use makes it a preferred material for diverse application occasions and scenarios, helping you achieve stunning results with minimal effort and maximum impact.
