## Product Description

### Product Description:

The PVC Decorative Film is a versatile and high-quality surface material designed to enhance the aesthetic appeal and durability of various interior surfaces. Made from premium PVC material, this decorative film offers exceptional performance and a wide range of applications, making it an ideal choice for both residential and commercial projects.

Available in multiple surface finishes including Glossy, Matt, Embossed, Super Matt, and Soft Touch, the PVC Decorative Film caters to diverse design preferences and functional requirements. Whether you desire a sleek, shiny look or a subtle, textured feel, this product provides options to suit every style. The embossed finish adds a tactile dimension that mimics natural materials, while the soft touch surface delivers a luxurious, smooth sensation that enhances the user experience.

One of the key features of this PVC Decorative Film is its non-toxic composition, ensuring safety for indoor environments. It is manufactured with strict adherence to environmental standards, making it safe for use in homes, offices, and public buildings.

Additionally, the film is designed to be anti-flame, providing an added layer of safety by reducing the risk of fire hazards. This makes it particularly suitable for areas where fire resistance is a critical concern.

Moisture-proof properties further enhance the durability of the PVC Decorative Film. It effectively resists water penetration and humidity, preventing warping, peeling, or degradation over time. This moisture resistance makes it an excellent choice for application in kitchens, bathrooms, and other areas prone to dampness.

The versatility of this decorative film is evident in its wide range of applications. It is commonly used as a **pvc wood grain foil** to replicate the natural beauty of wood surfaces, providing an economical and low-maintenance alternative to real wood. The **pvc vacuum press film** variant is specially designed for vacuum pressing technology, allowing for seamless and wrinkle-free adhesion on curved or complex surfaces. The film also serves as a durable and attractive **pvc door foil**, enhancing the appearance and longevity of interior doors.

The PVC Decorative Film is suitable for application on furniture, cabinets, doors, walls, ceilings, profiles, and many other surfaces. Its adaptability ensures it can meet the demands of various design projects, from modern minimalist interiors to classic and rustic décors. The film's excellent adhesion and flexibility allow it to conform to different shapes and substrates without compromising its visual or physical qualities.

In terms of dimensions, the film is available in widths of 1260mm and 1400mm, providing ample coverage for large surfaces and facilitating efficient installation. These standard widths make it easy to handle and reduce the number of joints required, resulting in a cleaner and more professional finish.

Overall, the PVC Decorative Film combines aesthetic versatility with practical features such as non-toxicity, anti-flame resistance, and moisture-proof performance. Whether used as a *pvc wood grain foil* to bring warmth and texture to furniture or as a *pvc door foil* to protect and beautify doors, this product offers a reliable and attractive solution for enhancing interior surfaces. Its availability in multiple finishes and sizes further ensures that it can meet the specific needs of any project, making it a preferred choice among architects, designers, and builders worldwide.

### Features:

Product Name: PVC Decorative Film

Thickness range: 0.10mm to 0.50mm

Length options: 100m to 400m

Surface finishes available: Glossy, Matt, Embossed, Super Matt, Soft Touch

### Applications:

Realsun Deco PVC Decorative Film, originating from Foshan, China, offers a versatile and high-quality solution for various application occasions and scenarios. As a premium pvc membrane foil, it is widely used in interior decoration, furniture manufacturing, automotive interiors, and architectural projects. Its excellent features, including non-toxic properties, anti-flame resistance, and moisture-proof capabilities, make it an ideal choice for both residential and commercial environments where safety and durability are paramount.

This pvc lamination foil is perfectly suited for enhancing the aesthetic appeal of cabinets, wardrobes, doors, and wall panels. Thanks to its diverse surface options—glossy, matt, embossed, super matt, and soft touch—designers and manufacturers can achieve a wide range of

textures and finishes, catering to modern, classic, or bespoke interior styles. The product's thickness ranges from 0.10mm to 0.50mm, allowing for customization based on the specific needs of different projects.

In large-scale industrial applications, Realsun Deco PVC Decorative Film is favored due to its reliable supply ability of 500,000 meters per month and flexible length options from 100m to 400m per roll. The minimum order quantity of 3000 meters per model and negotiable pricing ensure that clients can efficiently manage their budgets and project scales. The packaging in rolls facilitates easy handling and installation, optimizing the workflow for manufacturers and contractors alike.

The delivery time of 15-20 days coupled with secure payment terms—T/T 30% down payment and 70% balance before shipment—makes Realsun Deco a dependable partner for timely project completion. Whether used as pvc lamination foil for surface finishing or as pvc membrane foil for protective overlay, this decorative film enhances product longevity and visual appeal while maintaining environmental safety standards.

Overall, Realsun Deco PVC Decorative Film is an excellent choice for anyone seeking a durable, safe, and aesthetically versatile material for decorative and protective applications across a broad spectrum of industries and design scenarios.
