- Highlight: **high gloss pvc film, non toxic pvc film, moisture proof pvc film**

Product Description

Product Description:

The PVC Decorative Film is a versatile and high-quality material designed to enhance the aesthetic appeal and durability of various surfaces. Manufactured from premium PVC, this decorative film is an excellent choice for applications in furniture, cabinets, doors, walls, ceilings, profiles, and more. Its adaptability makes it an ideal solution for both residential and commercial projects, providing a sleek and modern finish that is both functional and visually appealing.

One of the standout features of this PVC decorative film is its availability in a wide range of lengths, from 100 meters up to 400 meters. This extensive length range ensures that you can select the perfect quantity for any project size, whether you are refurbishing a single piece of furniture or outfitting an entire interior space. The film's thickness ranges from 0.10mm to 0.50mm, allowing for customization based on the specific requirements of the application. Thinner films offer flexibility and ease of application, while thicker films provide enhanced durability and protection.

Crafted from high-quality PVC, this decorative film combines strength with lightweight properties, making it easy to handle and install. The material is non-toxic, ensuring safety for both installers and end-users. This is particularly important in environments such as homes and offices where health and safety are paramount. Additionally, the film is designed with anti-flame properties, which significantly reduce the risk of fire hazards. This feature is especially beneficial when applied to doors and wall surfaces, contributing to overall building safety standards.

Moisture-proof characteristics further enhance the functionality of the PVC membrane foil. This makes it an excellent choice for areas prone to humidity or moisture exposure, such as kitchens, bathrooms, and basements. The moisture resistance prevents swelling, warping, or peeling, thereby extending the lifespan of the surfaces it covers. This durability ensures that the PVC foil maintains its appearance and protective qualities over time, even in challenging environmental conditions.

Specifically tailored for use as a pvc foil for wardrobe applications, this decorative film provides an attractive finish that is resistant to scratches and everyday wear and tear. It allows wardrobes to maintain a fresh, polished look while protecting the underlying material from damage. Similarly, when used as a pvc door foil, it enhances the door's surface with a smooth, decorative layer that is easy to clean and maintain. The film's resistance to flame and moisture adds an extra layer of safety and longevity to doors, which are frequently subjected to varying environmental factors.

The PVC Decorative Film is also well-suited for wall and ceiling applications, offering a cost-effective alternative to traditional painting or wallpapering. Its easy installation process saves time and labor costs, while its robust features ensure long-lasting performance. Profiles and other architectural elements benefit from the film's flexibility and adaptability, allowing for seamless coverage and a uniform appearance.

In summary, this PVC decorative film stands out as a highly functional and aesthetically pleasing solution for a variety of interior design and renovation needs. Its combination of non-toxic composition, anti-flame safety, and moisture-proof durability makes it a reliable choice for protecting and beautifying furniture, cabinets, doors, walls, ceilings, and profiles. Whether you need a pvc membrane foil for extensive commercial use or a pvc foil for wardrobe and door enhancements, this product delivers exceptional quality and versatility. With customizable length and thickness options, it provides the perfect fit for any project, ensuring satisfaction and lasting value.

Applications:

Realsun Deco PVC Decorative Film, originating from Foshan, China, is an exceptional choice for a wide range of application occasions and scenarios, thanks to its versatile features and premium quality. This product is crafted from high-quality PVC material, available in widths of 1260mm and 1400mm, and comes in various surface finishes including glossy, matt, embossed, super matt, and soft touch.

These options allow designers and manufacturers to achieve the perfect aesthetic and tactile experience for their projects.

One of the primary applications of Realsun Deco PVC Decorative Film is in the production of pvc door foil. It is widely used to enhance the appearance and durability of interior and exterior doors, providing a stylish and protective layer that is both moisture-proof and anti-flame. The non-toxic nature of the film ensures safety in residential and commercial environments, making it an ideal choice for home improvement, office renovations, and hospitality industry projects.

The soft touch pvc foil variant is particularly favored for applications requiring a luxurious feel and elegant finish. This surface type is perfect for furniture laminates, cabinetry, and wall panels, where a smooth and comfortable touch is desired. Its moisture-proof and anti-flame features further contribute to its suitability for use in kitchens, bathrooms, and other areas prone to humidity and heat.

Another important application is in pvc vacuum press film processes, where the film is used in vacuum forming and pressing techniques to create high-quality decorative surfaces on various substrates. This makes it ideal for manufacturing furniture components, automotive interiors, and decorative panels with enhanced durability and aesthetic appeal.

Realsun Deco PVC Decorative Film is supplied in convenient roll packaging, with a minimum order quantity of 3000 meters per model. With a strong supply ability of 500,000 meters per month and a delivery time of 15-20 days, it caters efficiently to large-scale production demands. Pricing is negotiable, and payment terms include a 30% down payment via T/T with the remaining 70% balance before shipment, ensuring a smooth and reliable purchasing process.

Overall, Realsun Deco PVC Decorative Film stands out as a highly adaptable and reliable material for various decorative and protective applications, meeting the needs of industries seeking quality, safety, and aesthetic excellence in pvc door foil, soft touch pvc foil, and pvc vacuum press film products.
