## Product Description

### Product Description:

The PVC Decorative Film is a versatile and high-quality material designed to enhance the aesthetic appeal and durability of various surfaces. Made from premium PVC (Polyvinyl Chloride), this film offers a perfect blend of functionality and style, making it an ideal choice for interior decoration, furniture, and cabinetry. The product is available in multiple thicknesses ranging from 0.10mm to 0.50mm, allowing for customization based on specific application requirements. With widths of 1260mm and 1400mm, it provides ample coverage for large surfaces, making installation efficient and seamless.

One of the standout features of this PVC Decorative Film is its non-toxic nature, ensuring that it is safe for use in residential and commercial environments. This characteristic is particularly important for applications in spaces where health and safety are paramount, such as homes, schools, and healthcare facilities. Additionally, the film boasts anti-flame properties, enhancing its safety profile by reducing the risk of fire hazards. This makes it a reliable material choice for environments that require stringent fire safety standards. Moisture-proofing is another critical attribute of this decorative film. The moisture-resistant surface prevents water absorption, which helps in maintaining the integrity and appearance of the film over time. This feature is especially beneficial for use in areas prone to humidity, such as kitchens, bathrooms, and basements. By resisting moisture, the film helps to prevent warping, peeling, or bubbling, thereby extending the lifespan of the decorated surface.

The aesthetic versatility of this PVC Decorative Film is highlighted by its availability in various finishes, including the highly sought-after high gloss pvc film. The high gloss finish provides a sleek, shiny surface that adds a modern and sophisticated look to furniture and interior surfaces. This glossy appearance not only enhances visual appeal but also makes cleaning easier, as dirt and stains can be wiped away effortlessly. The high gloss pvc film is an excellent option for those looking to create a polished and elegant environment. In addition to the high gloss options, the product line includes pvc wood grain foil, which replicates the natural texture and appearance of real wood. This wood grain effect adds warmth and character to any space, offering a cost-effective alternative to genuine wood without compromising on style. The pvc wood grain foil is perfect for creating rustic, traditional, or contemporary designs, making it a versatile solution for a wide range of decorative projects.

For manufacturers and designers, the minimum order quantity (MOQ) for this PVC Decorative Film is set at 3000 meters per model. This MOQ ensures a steady supply of material for large-scale projects while maintaining competitive pricing. The ability to order in bulk makes this product suitable for commercial applications, including furniture production, interior paneling, and architectural design projects.

In summary, the PVC Decorative Film is a high-performance, aesthetically appealing material that combines safety, durability, and style. Its non-toxic, anti-flame, and moisture-proof features make it a reliable choice for various environments. Available in multiple thicknesses and widths, along with finishes like high gloss pvc film and pvc wood grain foil, this product offers flexibility and design freedom for both residential and commercial uses. Whether you are looking to add a glossy finish or a natural wood look to your surfaces, this PVC Decorative Film is an excellent option that meets modern decorative and functional demands.

### Applications:

Realsun Deco's PVC Decorative Film, originating from Foshan, China, is a versatile and high-quality product designed to enhance a wide range of interior and exterior applications. With a supply ability of 500,000 meters per month and a minimum order quantity of 3000 meters per model, this product is ideal for both large-scale projects and customized orders. The PVC membrane foil is available in various surface finishes, including Glossy, Matt, Embossed, Super Matt, and Soft Touch, with thickness ranging from 0.10mm to 0.50mm, allowing for tailored solutions to meet different aesthetic and functional requirements.

One of the most common application occasions for the PVC decorative film is in the manufacturing and renovation of furniture. The pvc door foil, known for its excellent adhesion and durability, is frequently used to wrap doors, cabinets, and wardrobes, providing a sleek and modern finish. Its moisture-proof and anti-flame features make it particularly suitable for use in kitchens, bathrooms, and other high-humidity environments, ensuring longevity and safety. The non-toxic nature of the film also guarantees that it is safe for use in residential

and commercial spaces alike.

The high gloss pvc film variant of Realsun Deco's product line is especially popular in retail and office spaces where a polished, reflective surface can enhance the visual appeal of interiors. It is also widely used in wall panels, ceiling decoration, and partition surfaces, providing a stylish yet practical alternative to traditional materials. The product's packaging in rolls, with lengths ranging from 100m to 400m, facilitates easy transportation and installation, making it an efficient choice for contractors and designers.

Realsun Deco offers flexible pricing with negotiable terms, and the delivery time is typically between 15 to 20 days, ensuring timely project completion. Payment terms include a T/T 30% down payment with the balance due before shipment, supporting smooth financial transactions. Overall, the PVC decorative film by Realsun Deco is an excellent choice for anyone seeking a durable, aesthetically pleasing, and safe surface finishing solution for doors, furniture, walls, and more.
