PVC decorative film for surface finishing**

Product Description

Product Description:

Our PVC Decorative Film is a versatile and high-quality material designed to enhance the aesthetic appeal and durability of various surfaces. Manufactured using premium PVC, this decorative film is available in a wide range of lengths from 100 meters to 400 meters, catering to both small-scale projects and large industrial applications. With widths of 1260mm and 1400mm, it offers ample coverage, making it suitable for various design and renovation needs.

This PVC Decorative Film comes in multiple surface finishes including Glossy, Matt, Embossed, Super Matt, and Soft Touch, allowing customers to select the perfect texture and appearance for their specific requirements. Whether you desire the sleek shine of a high gloss pvc film or the subtle elegance of a soft touch surface, this product delivers exceptional quality and visual appeal. The embossed finish adds depth and dimension, making it ideal for applications that require a more tactile and natural look.

One of the standout features of this decorative film is its ability to mimic natural materials, especially wood. Our pvc wood grain foil is expertly designed to replicate the rich textures and patterns of real wood, providing a cost-effective and low-maintenance alternative to traditional wood finishes. This makes it an excellent choice for furniture, cabinetry, and interior wall panels, where the warmth and beauty of wood are desired without the associated upkeep.

In addition to its visual qualities, the PVC Decorative Film is highly durable and resistant to wear, scratches, and moisture. This makes it a practical option for high-traffic areas and surfaces exposed to environmental stress. Its robust nature ensures long-lasting performance, maintaining its color and finish even under demanding conditions.

Specifically crafted for door applications, our pvc door foil offers superior adhesion and flexibility, making it easy to apply on various door types, including MDF, HDF, and other engineered wood products. The film's excellent conformability ensures a smooth, bubble-free finish, enhancing the door's appearance and protecting it from daily wear and tear. This feature makes it a preferred choice for both residential and commercial door manufacturing.

The minimum order quantity (MOQ) for each model is 3000 meters, which is ideal for manufacturers and distributors seeking to maintain consistent supply and uniformity across large batches. This MOQ ensures that customers receive a continuous and reliable supply of the decorative film, facilitating streamlined production processes.

Our PVC Decorative Film is also environmentally friendly, made from recyclable PVC materials that comply with international safety and quality standards. Its easy maintenance and long lifespan contribute to sustainable building and furnishing practices by reducing the need for frequent replacements and repairs.

Whether you are a manufacturer looking for a high-performance pvc wood grain foil, a contractor in need of premium pvc door foil, or a designer aiming to incorporate a high gloss pvc film into your projects, this decorative film offers an excellent balance of aesthetics, durability, and functionality. Its wide range of surface finishes, combined with customizable lengths and widths, makes it an adaptable solution for various decorative and protective applications.

In summary, our PVC Decorative Film stands out in the market due to its superior material quality, diverse surface options, and practical dimensions. It is an ideal choice for those seeking to enhance the visual appeal and longevity of furniture, doors, walls, and other surfaces. With its exceptional performance and attractive finishes, it is the perfect material to bring your design visions to life while ensuring lasting protection and style.

Applications:

Realsun Deco PVC Decorative Film, originating from Foshan, China, is an ideal choice for a wide range of application occasions and scenarios. With a robust supply ability of 500,000 meters per month and a minimum order quantity of 3000 meters per model, this product is designed to meet both large-scale commercial projects and specialized interior decoration needs. The film is available in various lengths ranging from 100 meters to 400 meters and widths of 1260mm and 1400mm, providing flexibility for different design requirements.

One of the standout features of Realsun Deco PVC Decorative Film is its versatile surface options, including glossy, matt, embossed, super matt, and the highly sought-after soft touch PVC foil. These surface finishes enhance the tactile and visual appeal of furniture, cabinets, doors, walls, ceilings, and profiles, making it perfect for both residential and commercial interiors. The soft touch PVC foil, in particular, adds a luxurious feel to surfaces, elevating the overall aesthetic of any space.

The PVC marble film variant offers an elegant and realistic marble effect, ideal for creating sophisticated designs in kitchens, bathrooms, and living areas without the high cost and weight of natural stone. This makes it a popular choice for refurbishing furniture, wall panels, and decorative profiles, delivering a premium look with ease of installation and maintenance.

For industrial and manufacturing applications, the PVC vacuum press film is highly effective. It is specially designed for vacuum press machines, allowing for seamless wrapping and finishing of complex shapes and surfaces. This makes it an excellent option for cabinetry, door surfaces, and furniture production lines, where durability and perfect adhesion are critical.

Realsun Deco PVC Decorative Film is carefully packaged in rolls for safe transportation and easy handling. With a thickness range of 0.10mm to 0.50mm, the film offers durability and flexibility to suit different project demands. The delivery time is typically 15-20 days, and payment terms include T/T with 30% down payment and 70% balance before shipment, making the procurement process smooth and efficient.

Overall, Realsun Deco PVC Decorative Film is a versatile, high-quality product that caters to a variety of decorative and functional applications. Whether you are looking to enhance furniture surfaces with soft touch PVC foil, achieve a luxurious look with PVC marble film, or streamline manufacturing with PVC vacuum press film, this product from Foshan, China, offers a perfect blend of aesthetics, durability, and practicality.
