Product Description

Product Description:

The PVC Decorative Film is a versatile and high-quality material designed to enhance the aesthetics and durability of various surfaces. Manufactured from premium PVC material, this decorative film offers a perfect combination of functionality and style, making it an ideal choice for applications such as furniture, cabinets, doors, walls, ceilings, profiles, and much more. Available in lengths ranging from 100 meters to 400 meters, this product provides ample coverage for both small and large-scale projects, ensuring convenience and efficiency for manufacturers, designers, and DIY enthusiasts alike.

One of the standout features of this PVC Decorative Film is its wide range of surface finishes, including glossy, matt, embossed, super matt, and soft touch. This variety allows users to select the perfect texture and appearance to match their design preferences and project requirements. Whether you desire a sleek, shiny look with the glossy finish or a subtle, sophisticated feel with the soft touch surface, this film caters to diverse aesthetic demands. The embossed option adds depth and texture, creating a distinctive and elegant effect that can elevate the visual appeal of any interior space.

In addition to its attractive surface options, the PVC Decorative Film is engineered to be non-toxic, ensuring safety for both installers and end-users. This makes it especially suitable for residential and commercial environments where health and safety standards are a priority. Moreover, the film is anti-flame, providing an added layer of protection against fire hazards. This feature is particularly important for applications in public buildings, offices, and homes where fire safety regulations must be adhered to. The moisture-proof characteristic of the film further enhances its durability and longevity by preventing damage caused by humidity and damp conditions, making it an excellent choice for use in bathrooms, kitchens, and other moisture-prone areas.

As a type of pvc lamination foil, this decorative film serves as a protective and decorative layer that can be laminated onto various substrates. Its compatibility with different surfaces makes it highly adaptable for use in the manufacture of wardrobes, where pvc foil for wardrobe applications is in high demand. The film's ability to provide a smooth, uniform finish while protecting the underlying material from scratches, stains, and wear contributes to the overall quality and lifespan of wardrobe doors and panels.

Additionally, the product can be classified as a pvc membrane foil, widely used in the furniture and interior design industries. The membrane foil application involves wrapping or laminating the film onto furniture components, offering a seamless and attractive finish that mimics the look of wood grain, leather, or other textures. This makes it an economical and efficient solution for creating stylish furniture pieces without the need for expensive materials or complex craftsmanship.

In summary, the PVC Decorative Film is a multifunctional, high-performance product that combines aesthetic appeal with practical benefits. Its availability in multiple lengths from 100m to 400m ensures flexibility for various project sizes, while its diverse surface finishes cater to a wide range of design styles. The film's non-toxic, anti-flame, and moisture-proof properties guarantee safety, durability, and reliability in any application. Whether used as pvc lamination foil, pvc foil for wardrobe manufacturing, or pvc membrane foil for furniture wrapping, this decorative film stands out as a top choice for enhancing interiors with style and protection.

Applications:

Realsun Deco, a reputable brand originating from Foshan, China, offers high-quality PVC Decorative Films that are ideal for a wide range of applications. With a supply ability of 500,000 meters per month and a minimum order quantity of 3000 meters per model, these films come in rolls ranging from 100 meters to 400 meters in length, providing flexibility for various project sizes. The pricing is negotiable, making it an attractive option for both small and large-scale projects. Payment terms include a T/T 30% down payment with the remaining 70% balance due before shipment, and delivery is typically within 15 to 20 days.

Realsun Deco's PVC Decorative Films are available in various surface finishes such as glossy, matt, embossed, super matt, and soft

touch, allowing customers to select the perfect texture to enhance their design aesthetics. These films are crafted from high-quality PVC material, known for being non-toxic, anti-flame, and moisture-proof, ensuring safety and durability in various environments. The films are particularly suitable for applications on furniture, cabinets, doors, walls, ceilings, and profiles, making them versatile for residential, commercial, and industrial interior decoration projects.

In particular, Realsun Deco's range includes pvc vacuum press film, pvc wood grain foil, and pvc marble film, each designed to mimic natural materials with excellent adhesion and finish quality. The pvc vacuum press film is perfect for complex curved surfaces and vacuum pressing processes, providing a smooth and consistent coating. The pvc wood grain foil offers a realistic wood appearance, ideal for cabinetry and furniture that require an elegant and natural wood finish. Meanwhile, the pvc marble film brings the luxurious look of marble to walls, countertops, and decorative panels without the high cost and weight of real stone.

These PVC Decorative Films are widely used in different occasions and scenarios such as home renovations, office refurbishments, hotel and restaurant interiors, retail store fit-outs, and custom furniture manufacturing. Their moisture-proof and anti-flame properties make them suitable for humid environments and areas where fire safety is a concern. Additionally, the non-toxic nature of the films ensures a safe indoor environment, suitable for spaces like hospitals, schools, and childcare centers.

Packaged securely in rolls, Realsun Deco's PVC Decorative Films are easy to handle and install, providing an efficient solution for both professional installers and DIY enthusiasts. Whether you are looking to refresh old surfaces or create new stylish interiors, these films offer an economical and environmentally friendly alternative to traditional materials. With Realsun Deco's commitment to quality and customer satisfaction, their PVC Decorative Films are an excellent choice for diverse decorative needs.
